

Erledigt ozmosis 10.12.2 & SIP

Beitrag von „pinaudnico“ vom 22. Dezember 2016, 18:38

Hello everybody, I've seen os x 10.12.2 can reactivate [SIP](#). But on my ozmosis hack, i have deactivated it to have it working. If it is activated, os X doesn't boot. So can I upgrade to 10.12.2 or not ? Thanks for help. Nicolas
