Erledigt ozmosis 10.12.2 & SIP

Beitrag von „pinaudnico" vom 23. Dezember 2016, 15:36

Thanks for that. But what is csr-active-config for ?
I've got a apple keyboard, do you what is the key combination on it ?
I will try that soon.

edit :
Ah ok. It controls [SIP](#). Does 14.2 better than 14.1 ? I've got problems with long sleep.I also try to install sierra on another SSD and it boots with no problem. No internet and I don't remember which kext I use...
