

Erledigt

M.2 SSD + Grafikkarte + mehrere HDDs

Beitrag von „TakisGR“ vom 2. Januar 2017, 15:12

Rambo45 Versuch über die recoveri zu installieren,

grade hab in die Anleitung von ga z97 geschaut,

A RAID 0 or RAID 1 con guration requires at least two hard drives. If more than two hard drives are to be used, the total number of hard drives must be an even number.

A RAID 5 con guration requires at least three hard drives. (The total number of hard drives does not have to be an even number.)

A RAID 10 con guration requires four hard drives.

To enable hot-plugging for the SATA ports, refer to Chapter 2, "BIOS Setup," "Peripherals\SATA Con guration," for more information.

M.2, SATA Express, and SATA3 4/5 connectors can only be used one at a time. The SATA3 4/5 connectors will become unavailable when an M.2 SSD is installed.

- Die Anschlüsse M.2, SATA Express und SATA3 4/5 können nur einzeln verwendet werden. Der SATA3 4/5

Anschlüsse werden nicht verfügbar, wenn eine M.2 SSD installiert ist.
