

VIA VT2020/2021 (Z77X-D3H) mit DSDT Patch

Beitrag von „SonicBSV“ vom 15. Januar 2017, 16:16

MacPeet, some ports masked for that would have worked the other, hence there are not clear solutions in pin config.

For example, the implementation of 5.1 is possible but not stable, because this codec is very bad for AppleHDA. Best alternative this is VoodooHDA. Look my post up.

Maybe I misunderstood..... what is so bad autodetect headphones?

Check this please (SPDIF Out fix) ,change Platforms.xml.zlib in my patched AppleHDA [Platforms.xml.zlib](#)
