

VIA VT2020/2021 (Z77X-D3H) mit DSDT Patch

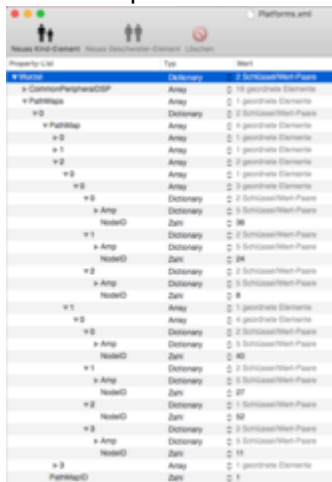

Beitrag von „MacPeet“ vom 15. Januar 2017, 17:10

Yes, VoodooHDA is going, but we are looking for another solution.

Does Autodetect work with HP with your PinConfig?

Autodetect HP in switch mode works well with laptops. There are often problems with desktops. If both outputs are back green in the PinConfig, it makes no sense. LineOut is connected to back green, so HP would have to be placed on front. It is often not recognized for desktop computers.

different possibilities:

or
