

# macOS Sierra 10.12.4 Beta 1 - ACHTUNG BEI DER INSTALLATION

**Beitrag von „griven“ vom 26. Januar 2017, 12:04**

Right after the Upgrade there are no issues with OZ as long as you don't touch the prelinked Kernel. Once the prelinked Kernel get touched (eg. new kext installed or applied a patch) boot with OZ will fail because of missing FakeSMC...
