

macOS Sierra 10.12.4 Beta 1 - ACHTUNG BEI DER INSTALLATION

Beitrag von „griven“ vom 28. Januar 2017, 12:51

Hey crusher go ahead and rebuild KernelCache and it won't work anymore. As I said without touching the KernelCache/Prelinked Kernel everything is fine but once it got rebuild it won't work anymore. I needed to apply a few patches to BCM46XX.kext basically whitelist Patches and after rebuilding the prelinked Kernel it won't boot anymore using OZ...
