## Hilfe Ozmosis Update von 894M zu 167X

Beitrag von „Herky85“ vom 28. Januar 2017, 22:46

Bootet einwandfrei 👍

Bei Ozmosis Toolbox sehe ich jetzt auch endlich mal was, funktionierte beim alten Ozmosis nicht, mal alles durchlesen was ich finde und ändern

The screenshot shows the Ozmosis Toolbox application window. It contains a grid of configuration fields for system identification and boot options. The fields are organized into columns and rows, with some fields having dropdown menus or text input boxes. The 'Product Name' field is highlighted with a blue border and contains the text 'MacPro3,1'.

Base Board Asset Tag	Manufacturer	Acpi Loader Mode
