macOS Sierra and High Sierra - Gigabyte GA-X99-Ultra Gaming i7-6850K

Beitrag von „sygey“ vom 29. Januar 2017, 11:33

macOS Sierra 10.12.3 working well on Gigabyte GA-X99-Ultra Gaming i7-6850K

My graphics card its a gtx 1080 g1 pascal. and its not working since apple have no pascal support yet!

Here it,s my EFI for Clover and Extra for Chameleon Enoch [hackintosh-](#)
