Maybe english is a better option 😉

Actually I'm searching for a donated laptop with a Realtek cardreader for development and testing for my own. I'm not looking for testers since this would be way too complicated. I'm a student and can't afford another laptop just for this reason, since it works fine with my HP 8460P.

By the way: I can't find the cardreader device in your IOReg file. Maybe it's disabled in your BIOS or DSDT. Can I see your Clover configuration and original DSDT?
