

AMD RX 490 und RX 480

Beitrag von „sev7en“ vom 4. Februar 2017, 03:01

Dear Brumbaer,
as first thanks for your support! I am attaching the file I patched... can you kindly check and help me? Where is the wrong?

As soon copied inside the Extensions' folders which one are the command I have to run to make them at work?

[AMDRadeonX4000.kext.zip](#)

[AMD9500Controller.kext.zip](#)

Thanks or better...
