[v7xR1] - ASUS ROG Maximus IX Formula + i7-7700K + RX480... my next MacPro!

Beitrag von „Brumbaer“ vom 4. Februar 2017, 11:29

Any graphics card (with a HDMI or DP connector) will work in a Hack regardless of being supported by Apple. And so does the HD630.

If it is not supported, you will not get no acceleration, that's all.

Anyway, you can set FakeID to get acceleration for the HD630, should you need it.
