MLB GENERATOR application

Beitrag von „al6042“ vom 10. Februar 2017, 20:57

You don't have to use such a application.

The MLB must be 17 letters long.

Use your Serialnumber, which should be 12 letters long, and add 5 more letters of the hexadecimal range. (0 to 9 and A to F).

Use the 17 letters result as MLB... voila... 😊
