

## **Erledigt** MLB GENERATOR application

**Beitrag von „al6042“ vom 10. Februar 2017, 22:49**

Just use the variable "UseMacAddr0" in the clover configurator or add the MAC-Adress of your onboard network card.

You can find the value in "System Preferences" -> "Network" -> "Ethernet" -> "Advanced" -> "Hardware":

If you add these numbers/letters as ROM value, do not use the colon-symbol, just the numbers and letters.
