MLB GENERATOR application

Beitrag von „al6042“ vom 11. Februar 2017, 13:00

Hi,

this file will be automatically created, if you use the "EmuVariableUefi-64.efi" in Clover together with the RC Scripts.

It will contain the NVRAM-Informationen and is used by the RC-Scripts to save new entries on Shutdown and inject them on Startup via those RC-Scripts.
