MLB GENERATOR application

Beitrag von „al6042“ vom 11. Februar 2017, 20:36

Ouch... that could be the problem... using Serialnumbers of original Macs should not be done and is also not necessary.

Do you mean a Admin Account or a Standard User?

On my machines the one user-ID I use is an admin, since I know what I'm doing... I think... 😊

Send me your current config.plist and I'll check if I can see if anything's wrong with it.
