

Enoch (Revision vom Chameleon Bootloader)

Beitrag von „derHackfan“ vom 11. Februar 2017, 23:31

Enoch r2848 mit macOS Sierra 10.12 Support

- Ability to load Nvidia Webdriver (Sierra) (by Micky1979)
- Update for Kernel ver. detection and macOS installer path (by Micky1979)
- add OS name in the log, typo
- **Add data for ALC1220 (hda.c/h)**
- Dropping DMAR (DMA Remapping table) to use stock AppleACPIplatform.kext - resolves stuck on "waitForSystemMapper" or "[PCI configuration begin]" 2) Added "ACPI" (all capitals) path 3) Small cosmetics
