macOS Sierra on Asus N73SV Clover bootloader Legacy

Beitrag von „griven“ vom 19. Februar 2017, 02:10

You might need to set an Admin Passwort in Bios to enable the Secure Boot Settings. Some Laptops hide these settings unless an Admin or Supervisor Passwort is set. It took us some time to figure that out on lasts years HackCon since @Dr.Stein's Laptop also refuses to disable Secure Boot with no Admin Passwort configured.
