HELP ME - Asus Z87-K

Beitrag von „al6042“ vom 19. Februar 2017, 12:35

In that case I would read through the FAQs for Ozmosis:

<https://github.com/tuxuser/OzmosisBIOS/blob/master/README>

To install it, you must use the the methods mentioned in your board manual.

Chapter 2.1.2 "ASUS EZ Flash 2" or Chapter 2.1.3 "ASUS CrashFree BIOS 3 utility".

After that you should be able to boot from a Mac OSX USB [install stick](#) which you have to create from either an original Apple Mac-Device or another Hackintosh.
