Please help me create a DSDT for MSI Z97 GAMING 3

Beitrag von „chohsiao“ vom 30. März 2017, 16:45

Yes, I saw it with mmtool, I replace the applealc module and the OzmosisDefaults.plist in your rom, because the sound can not be work, and I insert the E2200 kext into the bios. 😊
But I do not understand the founction of "Lilu", Could you tell me that? Thank you. 😊
