

Clover Bootloader aktuelle und ältere Versionen

Beitrag von „al6042“ vom 20. April 2017, 23:29

Auch stehen die Räder nicht still...

Hier die Änderungen seit r4047, aktuellste zuerst:

- eliminate bugs with double common symbols
- merge edk2-UsbKbDxe with own driver
- revised intel graphic injection
- revised EDID patching by Sherlocks
- fix NVRAM, by lvs1974
- correct log message
- nvram save script 1.16.4 by tluck
- fix log dsdt patching
- use UTC date for nvram.plist, by lvs1974 / correct plist parsing
- EFI-API
- Fix EFI-API in CloverEFI/CpuDxe
- Create XCODE8 toolchain, fix discovered type and varargs mismatches
- additional paths for 10.12.4
- add path for 10.12.4 installer (thanks to bb1045)
