Ozmosis problem with ASUS MAXIMUS VII FORMULA

Beitrag von „Fredde2209“ vom 28. April 2017, 14:31

I wouldn't do so... But if you would like to spend the money, okay do it! I would definitely recommend the Z97-D3H, because I've done many tests using it and it works perfectly. The Bios is unbelievable big and there is enough space for all the drivers (sound, LAN etc).
