Anfrage für Bios Mod Z87-plus

Beitrag von „griven“ vom 15. Mai 2017, 23:24

[@Thomaso66](#) isn't active anymore but I guess I could help you out 😊

Here you go based on v. 2103 modded with the latest available OZ Build (Sierra Ready). Use Flashback to program this file since the checksum becomes invalid in the process of modifying and EZ Flash will refuse to flash it. Refer to your Users Manual to figure out how Flashback actually works.
