Need Help for Ozmosis Z97X-UD3H-BK rev1.2 F8

Beitrag von „arminmacx“ vom 19. Mai 2017, 00:12

Yes I did it first I enable my gt 640 and disable intel and it start to boot USB but at the middle of the progress it goes black screen I go and try again with verbose mod and saw that error I write above. Second I go and remove my gt 640 and only use intel and still same error
