MSI H97M-G43, i7-4770, latest Ozmosis for Sierra + Sierra 10.12.5 Samsung SSD 850 pro 256GB

I'm using the patched bios and DSDT form Fredde2209 from this post:

the dsdt file is on the efi partition

I was able to get sound working with voodohda, but I hear a loud buzz, like from a microphone.

Another strange thing is if I open yahoo.com and scroll down a little the pc freezes every time.
