My appleID get locked everytime i reinstall my hackintosh

Beitrag von „arminmacx“ vom 7. Juni 2017, 13:37

Hi guys,

Recently I get this which my apple id get locked and i need to reset my password after each reinstalling or some times after updating my hackintosh.

i checked my smbios it is same and serial number is same as always i kept it that way.

but today i checked my EFI folder and find something interesting in EFI/APPLE/FIRMWARE with name of IM142_0118_B14_LOCKED.scap what the hell is this. its never be there as long as i check it.
