## **My appleID get locked everytime i reinstall my hackintosh**

**Beitrag von „al6042“ vom 7. Juni 2017, 13:41**

Since your hack seems to be presented as an iMac14,2 the AppStore update mechanisms also provides Firmware updates and hotfixes for this device.

Those will be added to the directory you mentioned.

But since you don't have an original iMac14,2 those files should not do anything else but sitting around... 😊
