Usb Geräte bekommen kein Strom

Beitrag von „realwizzy“ vom 8. Juni 2017, 16:23

xhc finde ich nicht, habe über das Suchfeld und nur Tastatur wie in der Anleitung versucht.

The screenshot shows the IOService window for the device `AppleIntelPchSeriesAHCI`. The left pane displays a tree view of the system hierarchy, starting from `Root` and going down to `MacPro5,1`, `AppleACPIPlatformExpert`, `PCI0@0`, `AppleACPIPCI`, `IDE1@1F,2`, and finally `AppleIntelPchSeriesAHCI`. Under `AppleIntelPchSeriesAHCI`, several ports are listed: `PRIM@0`, `PRT2@2`, `PRT3@3`, `PRT4@4`, `PRT5@5`, and `SECD@1`. Below this, under `IOResources`, `AppleIntelCPUPowerManagement` and `AppleIntelSlowAdaptiveClockingManager` are visible.

The right pane shows the properties of the selected device:

Property	Type	Value
IOClass	String	AppleIntelPchSeriesAHCI
CFBundleIdentifier	String	com.apple.driver.AppleAHCIPort
IOProviderClass	String	IOPCIDevice
IOPowerManagement	Dictionary	6 values
IOProbeScore	Number	0x7d0
IONameMatch	Array	3 values
IOPolledInterface	String	AppleAHCIPolledAdapter is not serializable
IOMatchCategory	String	IODefaultMatchCategory
Trace ID	Number	0x1f0200
Vendor Name	String	Intel
AHCI-Ejectable	Boolean	False
IONameMatched	String	pci8086,3b22
AHCI-Built-In	Boolean	True
Chipset Name	String	5 Series Chipset
AHCI-CAP	Number	0xef22ff45
IOPMResetPowerStateOn...	Boolean	True

At the bottom of the window, the system information `Mac Pro (x86_64)` and the timestamp `08/06/2017 16:19:07` are visible.
