10.13. High Sierra mit Ozmosis

Beitrag von „nikoZ“ vom 9. Juni 2017, 12:59

Who know one way to drop ACPI "MATS" Tables to be able to boot system with Ozmosis. Unfortunately for my motherboard and CPU i have to do this. I did it in clover but i dont know a way for ozmosis. If i don't drop "MATS" ACPI Tables I get panic 0 cpu caller error on boot. Thanks.
