## 10.13. High Sierra mit Ozmosis

Beitrag von „nikoZ“ vom 11. Juni 2017, 17:26

could i do that via nvram command in terminal? I'll preffer that.

It may be `sudo nvram 1F8E0C02-58A9-4E34-AE22-2B63745FA101:AcpiLoaderMode=0x47`  
right?

I'll come back in a couple of minutes cuz im downloading something and i can't restart, yet!

Here its dump using clover <https://we.tl/XfEHKaiejK>
