10.13. High Sierra mit Ozmosis

Beitrag von „nikoZ“ vom 11. Juni 2017, 20:14

[@griven](#) Im glad to announce that, its working! I booted preinstalled HS with Ozmosis. Now we have to fix smcemulator to make clean install working with oz and fix apfs.efi also wich doesen't see APFS partition via bcfg load only!

Thanks!

Trying cleaninstall via createinstallmedia fails due smcemulator problems.
