macOS High Sierra 10.13 Beta (Full HD + SSD/HDD)

Beitrag von „griven“ vom 20. Juni 2017, 22:15

I guess he meant HDD and yes of course HighSierra works also with spinning disks 😊
If you plan to use a spinning Disk make sure you use HFS+ instead of APFS since APFS does not perform well on spinning Disks at least right now (it's not really made for them). HighSierra can be installed on HFS+ or APFS formatted drives 😊
