## **Edit DSDT table, nvidia GPU (MXM) DELL XPS one A2010**

**Beitrag von „al6042“ vom 24. Juni 2017, 15:34**

GFX0 is the Graphics part of the CPU, if there is one integrated.  
PEFP is the external Graphics part.

I never heard of MXM at all... 😊

A way to override the DSDT in Windows can be read in here -->  
<https://www.techinferno.com/in...override-to-fix-error-12/>
