Edit DSDT table, nvidia GPU (MXM) DELL XPS one A2010

Beitrag von „tsalat“ vom 26. Juni 2017, 08:21

Hi al6042,

tried to override the DSDT but got an BSOD at the end 😞 i also loaded the same DSDT to check if its working but loading the customized one cause BSOD...hmmm.. i guess that injecting inside the ROM will not do any difference, maybe brick the machine again 😂 any idea?
