

# Lilu - Generic kext patcher (neue Grundlage für diverse Kexte)

Beitrag von „Noir0SX“ vom 11. August 2017, 20:56

Schon paar Tage auf dem Markt, nur hier hat es keiner aktualisiert

## v1.1.6

- Ignored disabled kexts earlier for speed reasons
- Added High Sierra to the list of compatible OS
- Added arrsize API
- Made patch count warning only show in debug mode
- Made kinfo not found logging only show in debug mode
- Added routeBlock API for opcode-based routing
- Centralised user and kernel patcher start time
- Added c-compliant kern\_os\_cfree implementation
- Added a workaround for page fault kernel panics
- Added a workaround for xnu printf limitations
