Code

1. Aug 15 12:05:31 iMac OSInstaller[576]: ----- Install Failed -----
2. Aug 15 12:05:31 iMac OSInstaller[576]: Operation: Update firmware failed, Failure Reason: Error Domain=com.apple.osinstall Code=513 "An error occurred while updating firmware." UserInfo={NSLocalizedStringDescription=An error occurred while updating firmware., NSUnderlyingError=0x7fad735aae10 {Error Domain=com.apple.DiskManagement Code=-69767 "This disk doesn't contain an EFI system partition. If you want to start up your computer with this disk or include it in a RAID set, back up your data and partition this disk." UserInfo={NSLocalizedStringDescription=This disk doesn't contain an EFI system partition. If you want to start up your computer with this disk or include it in a RAID set, back up your data and partition this disk.}}}
3. Aug 15 12:05:31 iMac storagekitd[577]: Ejecting 1 disks
4. Aug 15 12:05:31 iMac OSInstaller[576]: Attempting to flush install log back to IA.log
5. Aug 15 12:05:31 iMac storagekitd[577]: Ejecting SKDisk { BSD Name: disk24s2 Mount point: /Volumes/InstallESD Role: kSKDiskRoleLegacyMacData Type: kSKDiskTypeHFS }

Keine EFI Partition? Sehr interessant 😊
