Installation auf ASUS B250M-C mit Kaby Lake CPU

Beitrag von „Dr.Stein“ vom 18. August 2017, 04:32

[@Ari](#) Welcome! 😊

It's easy to generate by you self.

Install the newest Clover on a usbstick and edit the config.plist with newest CloverConfigurator (use Download Center)

SMBIOS to iMac18,2 and newest fakesmc.kext in Other. Also you need USBInjectALL.kext and XHCI200injector.kext

Lilu.kext with IntelGraphicsFixup.kext if you use the Intel HD Graphics.
