macOS sierra in Thinkpad E560 help needed

Beitrag von „al6042“ vom 5. September 2017, 15:19

Thanks for the Info... 😊

Since the battery seems to work, I'd say try both SSDTs one after another and see what's happening when you check the speedsteps with the [Intel Power Gadget](#).

In regards to the DSDT, the Battery Patch was already set, but it seemed to have missed the "AC Adapter Fix" from the "Laptop"-Repository.

I added that, with a couple of other known Injections for Audio, Graphics, HDMI-Audio and some other stuff... 😊
