@al6042

Ok, I test it more with both SSDT,

In the attachments you will find two screenshots of both my SSDT and @iPhoneTruth of Intel Power Gadget

Which one is better?

And about the Battery red icon problem, I noticed that it turn red after the battery decreased by about 3% for example: if the battery is 77% the icon will turned red after the battery decreased to %74

and if I make a sleep and wake for the laptop, the battery icon turned to black again!
