## Umstieg von Chameleon zu Clover

**Beitrag von „JasMich“ vom 24. September 2017, 16:59**

Moin zusammen,  
nachdem ich nun lange Chameleon benutzt habe, möchte ich zum besseren Clover wechseln.  
Hat bisher alles gut geklappt, das System bootet, aber ich kriege keine GUI.  
Daher meine Frage: Wie kann ich folgende Boot-Parameter in Clover verwenden:

Code

1. dart=0 darkwake=0 slide=1

Wichtig ist: Die folgenden Parameter verhindern das Booten.

Code

1. nvda\_drv=1 nv\_disable=1 GraphicsEnabler=No

Meine ganzen Configs:

Wie müsste ich dafür die Clover config.plist gestalten?

Danke schon mal!
