Erledigt # GA Z97MX Gaming 5 - Bios Ozmosis (by Griven) - High Sierra - does not boot :p

Beitrag von „BabaMac" vom 30. September 2017, 01:05

Hi,
I am at present under sierra with Ozmosis, all work marvelously.
I downloaded bios supplied by Griven (thank you), but in the starting up, I have no menu (by resting the touch alt).
[Ozmosis Mod für Z97MX Gaming 5](#)

I can make a reset NVRAM (CMD+PR), but that's it!!
In passing bios under MMTOOL, I see that there is no horizontal thème ?(certainly to make way for apfs.ffs).
If I use F12 to throw(launch) the installation, I do not see my SSD!

Sorry for my english
