macOS Sierra and High Sierra - Gigabyte GA-X99-Ultra Gaming i7-6850K

Beitrag von „sygey“ vom 30. September 2017, 22:38

I installed High Sierra without any problems and xcpm works!

All USB ports works but I'm pretty shore that not full . I mean I think it works just as usb 2.

I not tested!

Here are some screens an the files updated!
