Galaxy Book 12 El Capitan on Oled device

Beitrag von „axel9546“ vom 19. Oktober 2017, 16:58

Hello guys

I have a Galaxy book 12

Specs i5 7200u / hd620 oled screen

Alc298 for audio

Wacom digitizer and touch.

Ive installed successfully el capitan, but have problem with audio and backlight.

As i know oled screen does not have lcd or ips backlight.

Could i still able to get backlight work? In windows work (dont know how).

I tried several ways, acpibacklight.kext or intelbacklight.kext. fn keys and slider works but no backlight changes.

Same for audio. Fn keys and slider works, but no audio

Could you help me :)?
