## **Hilfe bei Install: X299 | i7-7820X | GTX1080 -> Sierra 10.12.**

**Beitrag von „drnoodle“ vom 23. Oktober 2017, 17:35**

You Mount the EFI Partition if the stick. You mount the efi partition of the SSD/HDD. You copy the EFI Folder of the stick onto the HDD/SSD. If theres no EFI folder on your HDD/SSD you use clover and install clover onto the SSD/HDD and then you got an efi folder 😊
