Hilfe bei Install: X299 | i7-7820X | GTX1080 -> Sierra 10.12.

Beitrag von „DanyH83“ vom 23. Oktober 2017, 17:44

do I have to disassemble ssd from pc insert it "into a sata-usb caddy" and copy them from a macbook pro or is there a chance to boot from stick-ssd directly from the pc where i'm installing clover and high sierra?

sorry if I explained it badly
