Galaxy Book 12 El Capitan on Oled device

Beitrag von „axel9546“ vom 29. Oktober 2017, 09:33

I5 7200u Gpu is a HD620.
On my other folder i have
intelDVMTfixup
And also in clover i have the [dvmt](#) patch.
Could be that??

Yes on normal 2160x1440 is hidpi and very good!
But ui is too small, so i need someting like 1080x720

Tried VoodooHda But still no audio. Voodoo Hda Device not found .
Tried 10.13 and both Other folder.
Wizard Kext say that VoodooHda is not loading
Efi fold. Attached
