Updating from Yosemite - Computer frozen

Beitrag von „fborensz“ vom 13. November 2017, 17:09

Thanks, but unfortunately, I can't access to the shell either.

I only have access to my BIOS or to the same startmenu as shown here :

<https://i.ytimg.com/vi/G384uIQhwUY/hqdefault.jpg>

It shows 2 drives. One with no name and the second one, Recovery HD (of course, I have tried to boot on both of them)

Clicking on the top right thing that loos like a shell doesn't do anything.
