

## Erledigt Generelle Fragen zu DSDT

Beitrag von „Roman78“ vom 14. November 2017, 19:42

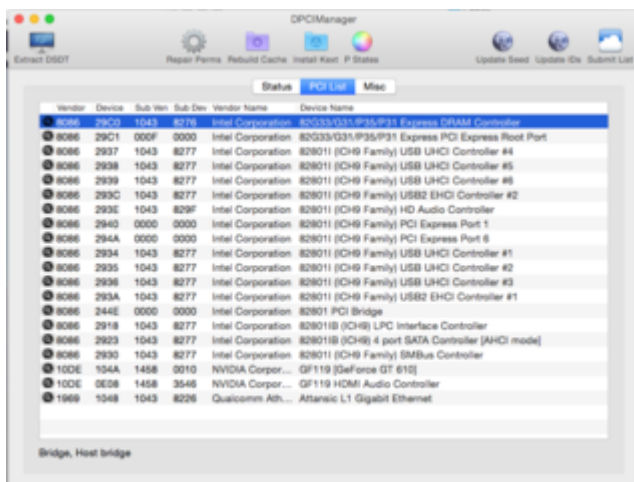

Dies sind die installierten Kext:

Code

1. 14 0 0xffffffff7f823af000 0x2000 0x2000 org.tgwbd.driver.NullCPUPowerManagement (1.0.0d2) <7 4 3>
2. 23 0 0xffffffff7f823b3000 0x11000 0x11000 org.netkas.driver.FakeSMC (1723) <11 7 5 4 3 1>
3. 43 0 0xffffffff7f81db1000 0x7000 0x7000 ru.Applelife.AtherosL1Ethernet (1.2.40b3) <42 12 5 4 3 1>
4. 79 0 0xffffffff7f81c90000 0x4000 0x4000 com.coresystems.driver.DirectHW (1.3) <7 5 4 3>

Ich habe die beiden Kext in den beschriebenen Ordner kopiert. Aber welche config.plist muss ich installieren?

Anbei noch die anderen Daten. Nur das mit dem IORegistryEditor Dump bekomme ich nicht hin. In welchem Programm muss ich das machen?

Vendor	Device	Sub-Ven	Sub-Dev	Vendor Name	Device Name
