Kein Audio nach Sleep Alc1150 Sierra

Beitrag von „al6042“ vom 18. Dezember 2017, 18:51

The issue with Ozmosis is the way of injection of the audio capability... While Clover just uses an entry in the config.plist, Ozmosis needs a patched DSDT.aml.

In that case, please put the attached, patched DSDT.aml into the directory /EFI/Oz/Acpi/Load of your hidden EFI-partition and try to restart...
