## **How to - wie bekomme ich High Sierra ohne Probleme auf meinen Rechner ?**

**Beitrag von „iPhoneTruth“ vom 19. Dezember 2017, 09:23**

Ok, damit bootet er weiter, allerdings kommen dann irgendwann Meldungen wie: „localhost com.apple.xpc.launchd[1] (com.displaypolicyd.546) <Warning>: Service exited with abnormal code: 1 (Siehe Bild).

Dann wird der Bildschirm irgendwann dunkel und dann geht gar nichts mehr 😞
